DETAILED ACTION

Response to Amendment

This Office Action is in response to applicant's communication with Examiner Portka on March 7, 2006, regarding an Election/Restriction Requirement. The applicant's remarks and amendment to the specification and/or claims were considered with the results that follow.

Claims 1-25 have been presented for examination in this application. In response to the phone conversation, claims 1-18 have been elected without traverse as per Grant Scott, Reg. NO. 36,925.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on October 17, 2003, March 5, 2004, and February 2, 2005 are in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Application/Control Number: 10/688,353

Art Unit: 2187

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, line 2, the phrase "...a search engine that is configured to support a plurality..." is not positively recited. A correction, such as replacing "...that is configured to support..." with –supporting— would remove this rejection.

Claim 9 recites the limitation "the multiple data cycles" in line 2. There is insufficient antecedent basis for this limitation in the claim. Multiple data cycles had not been previously recited.

Regarding claim 10, line 2, the phrase "...a search engine that is configured to support a plurality..." is not positively recited. A correction, such as replacing "...that is configured to support..." with –supporting—would remove this rejection.

Regarding claim 14, line 2, the phrase "...a search engine that is configured to support a plurality..." is not positively recited. A correction, such as replacing "...that is configured to support..." with –supporting— would remove this rejection.

Claim 14 recites the limitation "the first search key" in line 10. There is insufficient antecedent basis for this limitation in the claim. A first search key had not been previously recited. However, "a longest first search key" had been previously recited in line 5.

Regarding claim 15, line 2, the phrase "...a search engine that is configured to support a plurality..." is not positively recited. A correction, such as replacing "...that is configured to support..." with –supporting— would remove this rejection.

Regarding claim 17, lines 1-2, the phrase "...wherein the first replacement search key segment requires only one data cycle to load into said search engine" is not consistent with the parent claim. Parent claim 15, lines 6-7 recites "a first search key that requires multiple data cycles to load into said search engine...". It is unclear to the Examiner whether a single data cycle, or multiple data cycles, are required to load the first search key into the search engine.

Claims 2-8, 11-13, 16 and 18 are rejected as being dependent upon a previously rejected claim.

Allowable Subject Matter

Claims 2-9, 11-13, and 16-18 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 1, 10, 14, and 15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art corresponds to related CAM systems.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian R. Peugh whose telephone number is (571) 272-4199. The examiner can normally be reached on Monday-Thursday from 7:00am to 4:30pm. The examiner can also be reached on alternate Friday's from 7:00am to 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Donald Sparks, can be reached on (571) 272-4201. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 571-272-2100.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.
